Chapter 9: Implementing Responsive Data Validation

A form with two input fields. The first field is labeled "Name" and is empty. The second field is labeled "Price" and contains the value "0". Both fields have a red border, indicating they are required or have validation rules.

The form is shown with a mouse cursor hovering over the "Name" field. A tooltip message appears, stating "Please enter the product name." The "Price" field still contains "0".

The form is shown with a list of product names on the left and the input fields on the right. The list contains two entries, both labeled "Virtual Reality Headset". The "Name" field contains "Virtual Reality Headset" and the "Price" field contains "0". A red error message box is displayed, stating "Please enter a valid price for the product. The product name must be unique."

The product name cannot be longer than twenty-five characters.
The first letter of the product name must be a capital letter.
